

Recording

A LIFESCAPE book is created from high quality audio recordings of your family member relating their memoirs.

In most cases, we create these recordings through personal interviews, conducted face-to-face, over 2 or 3 days.

I conduct many of the interviews myself and all of our interviewers are carefully selected specialists who, like me, have been professional interviewers for over 20 years.

The interviewee invariably finds recording their life story very enjoyable and rewarding, as they are skilfully and sensitively guided on a journey through their memories.
